In Spring 2012 the 2RCCAFA has invited the Artist Ding Yi to produce his first etching in Beijing. This collaboration has been a great experience for all of us.

This first etching has been created by the artist using the soft ground and the dry-point techniques. Which really seem very appropriare for the artist.

Ding Yi has worked on this copper plate from mornng through evening for three days in a row achieving a great result.

Besides this is the first edition entirely produced at 2RCCAFA. We are very proud of this project.
